FULL STACK DEVELOPER INMET

Inmet is part of the government from Brazil and is responsible, mostly, for the meteorological forecast. I was responsible for the migration of legacy systems made in PHP to new technologies as react and node. I also worked with React Native and made some Apps like Inmet App.

All the new systems are made with JavaScript, React and Node.

The APIs are made with REST to any system or user be able to search any information they want.

At the react's frontend I used Hooks, Redux and Context API. At the react native mobile app, I used the APIs already done and Redux for the data sending between views.

Some of the old systems need to have their data preserved, so I made scripts Python to migrate their data to the new database with the necessary adjusts.

Worked with: HTML5, CSS, JavaScript, TypeScript, PHP, Python, Scrum, Kanban, PostgreSQL, MySQL, ReactJS, NodeJS, Yii2, React Native and AdonisJS.
